

Zahn Farm Website

Client

The goal is to create an online presence in an increasingly online focused market

The core aesthetic of the website is for the users to have something that is welcoming, appealing to look at, and is easy to use.

Product cards with images makes it easy to navigate to the desired items.

Walker Gross

Created the front-end and back-end of the website. Worked on parts of the database.

ORDER ID	CUSTOMER NAME	STATUS	ORDER DATE	DELIVERY DATE	DELIVERY LOCATION	TOTAL
VZEW 1	Doe, John	Delivered	2021-04-02	2021-04-21	Farm	\$27.00

Admin

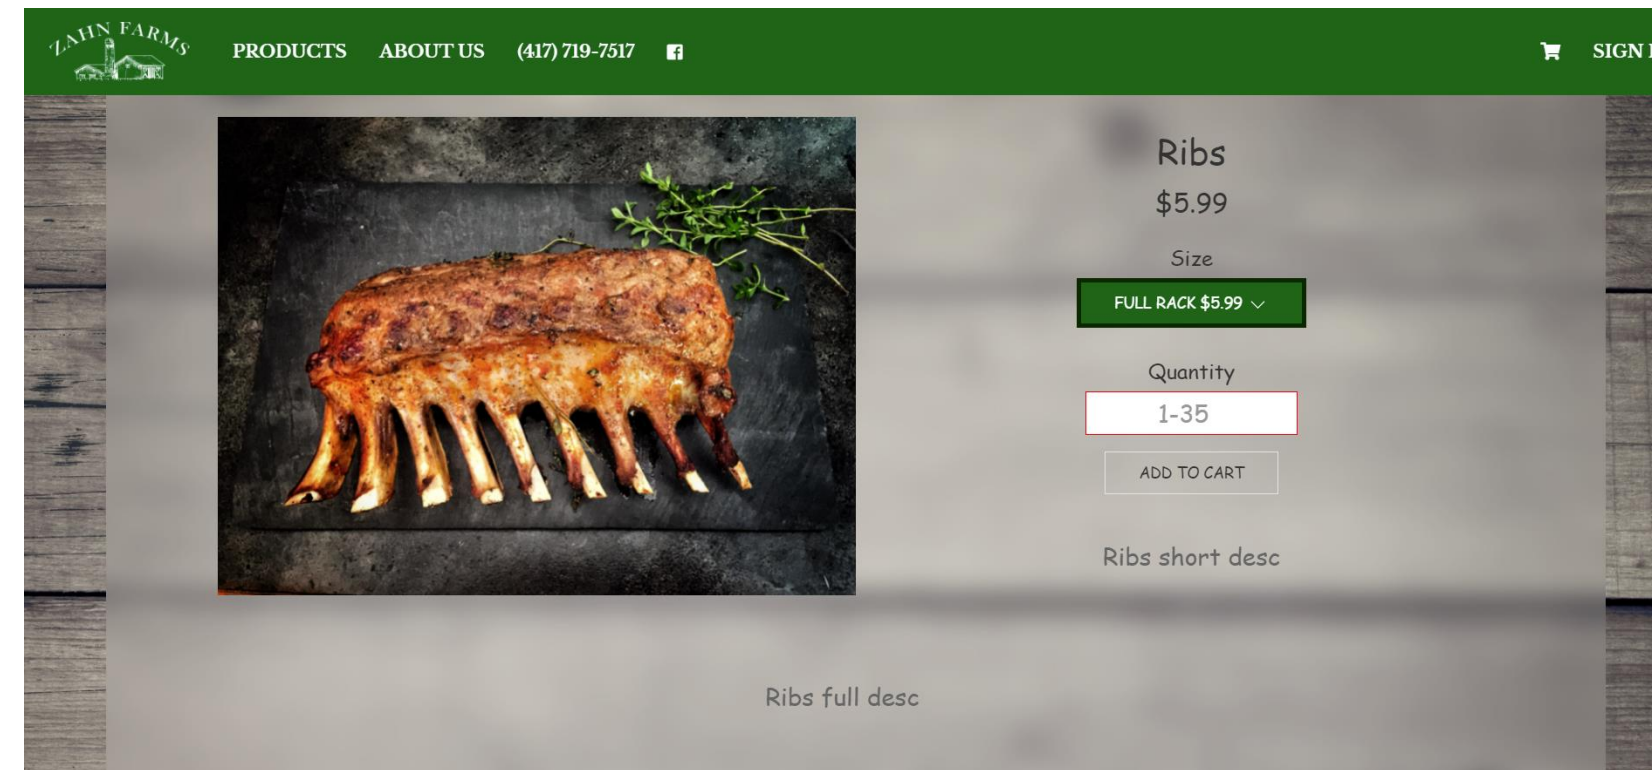

The admin page has 3 tabs.
Add / Edit / Orders

Add: Add a new product.

Edit: Edit categories and products.

Orders: View all orders and view individual orders.

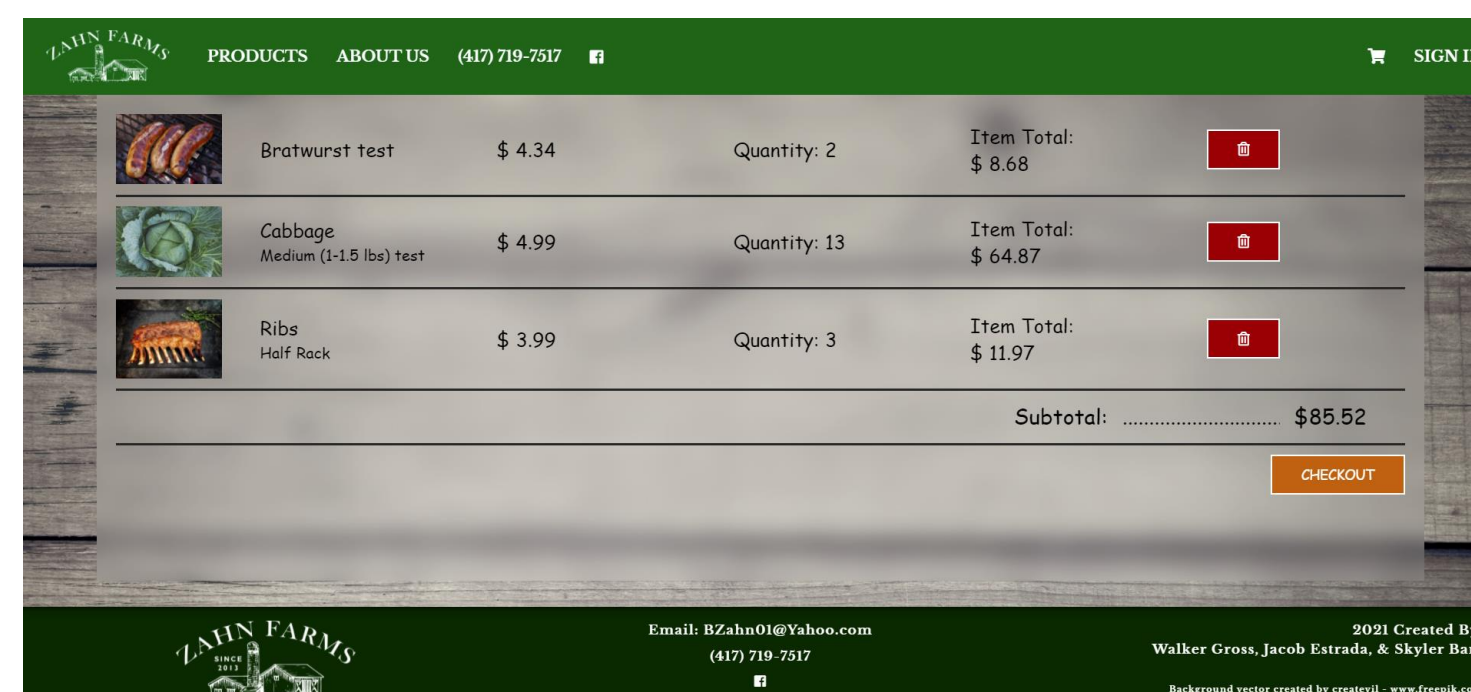

Product page allows selecting size and quantity to add to the cart.

Created some of the server-side code and did some database operations.

Skyler Barr

The cart allows customers to view what products they have added, how much each item costs, ability to remove from cart and the subtotal.

Jacob Estrada

Created and managed the database, any research necessary i.e., online payment, preparing documentation, and helped wherever necessary.
